INFORMATION

- Products made of #1 (PET) plastic can be recycled but not reused.
- Products made of #2 (HDPE) plastic can be recycled.
- Products made of #3 (PVC) plastic are not recyclable.
- Products made of #4 (LDPE) plastic are reusable, but not always recyclable. You need to check with your local collection service to see if they are accepting LDPE plastic items for recycling.

INFORMATION

- Products made of #5 (PP) plastic is considered safe for reuse. To recycle products made from PP, check with your local curbside program to see if they are now accepting this material.
- Products made of #6 (PS) plastic Polystyrene should be avoided where possible.
- Products made of #7 (BPA, Polycarbonate and LEXAN) is best to be avoided, especially for children's food.

INSTRUCTIONS

Phase 1:

- Participants separate the cards based on 3 sections (recyclable, often recyclable, non recyclable)

Phase 2: (plastic items only)

- Participants identify the type of the plastic items
- the facilitator explains the characteristics of each type of plastic

Note:

The solution is based on common practices of many countries around the world and might differ from one country to another, depending on the technology and methods used.
